Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 27 Sep 2022 until 23:59 on Wednesday 28 Sep 2022

Forecast Issued on Monday 26 Sep 2022 at 16:53

Confidence: High for cold, windy and showery conditions at first being replaced with drier and less windy weather mid-week before strong winds and heavy rain returns on Friday. Lower confidence in the details of showers and timings of the rain band and strongest winds on Friday.

Headline for Tuesday 27 Sep 2022: Another cold and breezy day with a chance of showers, but also some sunshine at times.

Forecast for Tuesday 27 Sep 2022

Weather: Another showery day, particularly during the morning, but probably fewer showers than on Monday with some drier and brighter periods during the afternoon. Mostly dry to end the day with a lower chance of isolated showers. Another breezy day, especially at higher levels where a strong north-westerly wind will continue, making it feel cold.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Periods of cloud above 800m, with occasional patches as low as 600-700m during any prolonged showers. This will give periods of poor or very poor visibility over the highest summits at times. Outside of the cloud and more generally at lower levels, visibility will be very good with excellent air clarity and distant hills clear to see. Sudden deteriorations at all levels during showers.

Freezing Level*	1400m	1400m	1400m	1400m	1500m	1500m	1500m	1500m	1400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts of up to 40mph are possible on some summits and this will make for some challenging walking conditions on exposed ridges. The wind will give a significant and unseasonable wind chill with it feeling below freezing on the highest summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 26 Sep 2022	0.2mm	0.2mm	2.6mm

Forecast for Wednesday 28 Sep 2022

Weather: Further showers are likely through the early hours of Wednesday but during the daytime the showers are likely to become isolated. Overall a drier day with lengthier sunny spells and winds easing to become moderate.

Maximum wind: North-westerly 20-30 mph easing to 15-20 mph gusting 25 mph.

Chance of cloud-free hill tops above 600m: 80%

Low cloud and visibility: Periods of cloud may briefly affect the highest summits, but most hills will be cloud free. Very poor visibility in cloud but otherwise visibility will be very good with excellent air clarity and distant hills clear to see. Sudden deteriorations at all levels during showers.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 12 Celsius.
At 600m: Plus 6 Celsius rising to plus 9 Celsius.
Freezing level: Just above the summits
